

**YOUR AI.
YOUR DATA CENTER.
YOUR CONTROL.**

**AI performance.
Economically implemented.**

Made in Germany.
100% own conception.
Series production with industrial
precision.
**We design, manufacture and operate
modular data centers for EDGE,
colocation and AI applications.**

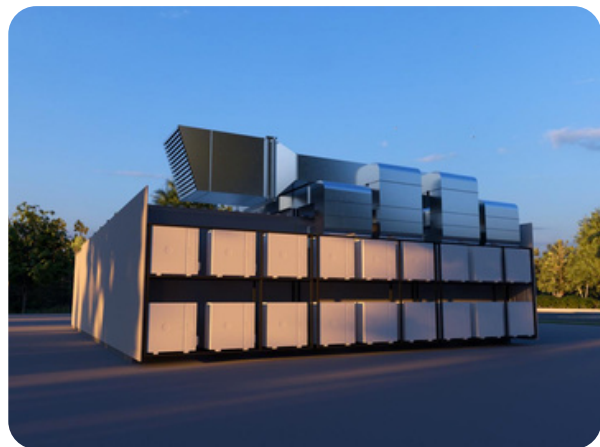

Your Data Center in 3 Months.

**Modular.
Turnkey.
AI-Ready in 3 months.**

From the all-in-one
module to the multi-
megawatt infrastructure:
architecture, energy,
cooling, security and
operation - completely
integrated.

**Industrially prefabricated.
Modularly scalable.
Ready to go immediately.**

Your modular DC advantages

Your data center in 3 months

- Industrially pre-fabricated
- Approval and production run in parallel
- No downtime, no waiting times

Up to 30% lower investment costs

- Large series components
- Own production
- No subcontractors
- No manufacturer's commitment

Pay as you Grow

- Expansion in just 8 weeks
- Modules remain transportable
- Infrastructure grows with your needs

**AI-Ready by Design.
Cost-efficient
implemented!**

**We are looking forward
to your project.**

Technical highlights

Maximum efficiency

- PUE below 1.15
- For AI applications below 1.1
- 25% more efficient than EnEfG requirements
- Planning, construction and operation according to EN 50600, information security according to ISO 27001

Ready for high performance and AI

- Up to 150 kW+ per rack
- Air cooling, liquid-to-chip or immersion cooling
- Also as a retrofit for existing data centers

Multi-MW-capable, availability up to VK4

- High availability due to minimal fault domains
- EMC-shielded and bulletproof
- Up to four floors in modular construction
